

## **A big THANKYOU**

I recently had a heart attack and am now on the way to a very good recovery. I took ill at home and my daughter dialled 999. The ambulance arrived quickly (I'm told) and I was stabilised and taken to the Jubilee in Glasgow. The next day I went through an angioplasty which was 100% successful and then transferred to DGRI where my care was continued. I was sent home with lots of pills and a heart manual, the latter becoming my 'bible' for the following weeks. I am now half way through cardiac rehab at Cluden house. I would like to say that from the minute the paramedics arrived at my door I have been treated with the utmost respect and dignity by all NHS staff. I am very impressed with the communication which must be taking place as everything appears seamless. I would like to thank all the staff with whom I have come in contact for the care and respect I have been given.

A big THANKYOU
